## OBJECTIVE

---

Driven Front-End Developer with strong proficiency in building responsive and user-friendly web applications using HTML, CSS, JavaScript, React, and Tailwind CSS. Experienced in creating interactive UI components, optimizing performance, and implementing modern design principles. Eager to contribute technical expertise and creative problem-solving skills to dynamic development teams and impactful web projects.

## INTERNSHIP & TRAINING

---

### Frontend Development Trainee ( React )

BufferBytes Technologies, Calicut

Jun 2025 - Present

- Built responsive web apps using HTML, CSS, JavaScript, React, Next.js and Tailwind CSS.
- Designed user-friendly interfaces with modern UI/UX practices.
- Collaborated with teams to integrate APIs and deliver clean, maintainable code.

## PROJECTS

---

### Visitor Experience Platform

- Developed a dynamic and efficient visitor verification platform using Next.js for the front end, integrated with Django and REST API for backend services.
- Implemented a QR code scanning feature to instantly retrieve and reuse visitor details, improving efficiency and user experience.

### E-Learning platform

- Developed an interactive learning platform using React, Flutter, Django, and REST API, enabling seamless student-teacher interaction and real-time content sharing..
- Implemented features to upload, view, and manage video study materials, enhancing the overall learning experience.
